Total: 24 test case(s)

ID	Title	Category	Steps	Expected Result
TC-001	Standard Login with Registered Email - Positive	Positive	Navigate to http://facebook.com Enter a registered email address in the email field Enter the correct password in the password field Click the "Log In" button	User is authenticated, redirected to the Home feed, a secure session is created, and the user's profile name and avatar appear in the header.
TC-002	Standard Login with Registered Phone Number - Positive	Positive	Navigate to http://facebook.com Enter a registered phone number in the phone field Enter the correct password Click the "Log In" button	User is authenticated, redirected to the Home feed, and a persistent login session is created.
TC-003	Login with Valid Email but Incorrect Password - Negative	Negative	Navigate to http://facebook.com Enter a registered email address Enter an incorrect password Click the "Log In" button	Authentication fails, user remains on the login page, and the error message "Incorrect password" is displayed. The failed attempt is logged.
TC-004	Login with Unregistered Email - Negative	Negative	Navigate to http://facebook.com Enter an email address that is not linked to any account Enter any password Click the "Log In" button	Authentication fails, and the message "No account found with this email/phone" is shown with options to sign up or recover account.
TC-005	Login with Unregistered Phone Number - Negative	Negative	Navigate to http://facebook.com Enter a phone number that is not linked to any account Enter any password Click the "Log In" button	Authentication fails, and the message "No account found with this email/phone" is displayed.
TC-006	Empty Credential Submission - Negative	Negative	Navigate to http://facebook.com Leave email/phone and password fields blank Click the "Log In" button	Client side validation prevents the request, inline validation messages appear for required fields, and no request is sent to the backend.
TC-007	Password Visibility Toggle - Positive	Positive	Navigate to http://facebook.com Enter any password Click the "Show" password icon Verify password characters become visible Click the "Hide" password icon Verify password characters are masked again	Password visibility toggles correctly; default state is masked. The toggle is operable via mouse, keyboard, and is announced by screen readers.
TC-008	Remember Me Session Persistence - Positive	Positive	Navigate to http://facebook.com Enter valid credentials Check the "Remember Me" option Click "Log In" Close the browser completely Reopen the browser and navigate to http://facebook.com	User is automatically logged in without re entering credentials; session persists across browser restarts until logout or expiration.
TC-009	Login with Two Factor Authentication (Valid OTP) - Positive	Positive	Navigate to http://facebook.com Enter a registered email and correct password for an account with 2FA enabled Click "Log In" Enter the valid OTP received via SMS/email/authenticator app Click "Verify"	OTP is accepted, user is authenticated, redirected to Home feed, and a secure session is created.
TC-010	Login with Expired OTP - Negative	Negative	Navigate to http://facebook.com Enter valid credentials for a account Click "Log In" Wait until the OTP expires Enter the expired OTP Click "Verify"	Authentication fails, error message "Invalid or expired code" is displayed, and the user can request a new OTP.

ID	Title	Category	Steps	Expected Result
TC-011	Login with Incorrect OTP - Negative	Negative	Navigate to http://facebook.com Enter valid credentials for a account Click "Log In" Enter an incorrect OTP Click "Verify"	Authentication fails, error message "Invalid or expired code" appears, and the user may request a new OTP.
TC-012	Account Locked after Multiple Failed Attempts - Negative	Negative	Navigate to http://facebook.com Enter a valid email Enter an incorrect password Click "Log In" Repeat the above step until the allowed failed attempt threshold is reached	Account is temporarily locked, message "Account temporarily locked" is shown, and the user is directed to password reset or identity verification flow.
TC-013	Forgot Password Flow - Positive	Positive	Navigate to http://facebook.com Click the "Forgot password?" link Enter a registered email or phone number Submit the request Enter the recovery code received Set a new password Confirm the new password Submit and log in with the new credentials	Recovery code is accepted, password is updated, and the user can log in successfully with the new password.
TC-014	Login from New Device with Verification - Positive	Positive	Navigate to http://facebook.com from a device/location not previously recognized Enter valid credentials Click "Log In" Complete the additional verification challenge (e.g., enter code sent to registered device) Confirm verification	After successful verification, user is logged in, receives a login alert notification, and the new device is added to trusted devices list.
TC-015	Login from New Device without Completing Verification - Negative	Negative	Navigate to http://facebook.com from an unknown device Enter valid credentials Click "Log In" Dismiss or fail the additional verification challenge	Login is blocked, error message indicating verification is required is displayed, and no session is created.
TC-016	Login Page Load Performance - Non-Functional	Non-Functional	Measure page load time for http://facebook.com under normal network conditions Repeat measurement during peak traffic using load testing tool with 10,000 concurrent users	Login page loads within 2 seconds under normal conditions and within 4 seconds under peak load; no HTTP errors are returned.
TC-017	Keyboard Navigation Accessibility - Non-Functional	Non-Functional	Navigate to http://facebook.com Use the Tab key to move focus through all interactive elements (email/phone field, password field, Show/Hide icon, Remember Me checkbox, Log In button, Forgot password link) Press Enter to activate focused elements	All elements receive focus in a logical order, can be activated via keyboard, and visual focus indicator is visible.
TC-018	Screen Reader Compatibility - Non-Functional	Non-Functional	Open http://facebook.com with a screen reader (e.g., NVDA, VoiceOver) Navigate through the login form Listen to announcements for each field and error message	Screen reader correctly reads labels, placeholder text, error messages, and button names; no information is missing.
TC-019	Login with Maximum Length Email (255 characters) - Edge	Edge	Navigate to http://facebook.com Enter an email address consisting of 255 characters before the @ symbol followed by a valid domain Enter the correct password Click "Log In"	If the email is registered, authentication succeeds and user is redirected; if not registered, appropriate "No account found" message appears. System handles the length without truncation errors.
TC-020	Login with Email Containing Allowed Special Characters - Edge	Edge	Navigate to http://facebook.com Enter an email address containing allowed special characters (e.g., user+test@example.co.uk) Enter the correct password Click "Log In"	Authentication succeeds and user is redirected to Home feed; system accepts special characters per RFC 5322.
TC-021	Login with Phone Number	Edge	Navigate to http://facebook.com	Phone number is normalized

ID	Title	Category	Steps	Expected Result
	Including Leading Zeros - Edge		Enter a phone number that includes leading zeros (e.g., 00123456789) Enter the correct password Click "Log In"	and authentication succeeds if the account exists; otherwise, appropriate error is shown.
TC-022	Log out and Re Log Positive	Positive	Log in with valid credentials Click the user avatar to open the dropdown menu Select "Log Out" Verify that the session is terminated and login page is displayed Enter the same credentials again Click "Log In"	Logout invalidates the session, user is returned to login page, and subsequent login succeeds with a new session.
TC-023	Session Persistence without Remember Me - Negative (Edge)	Negative	Navigate to http://facebook.com Enter valid credentials without checking "Remember Me" Click "Log In" Close the browser completely Reopen the browser and navigate to http://facebook.com	User is not automatically logged in; login page is shown, confirming that session does not persist across browser restarts when Remember Me is unchecked.
TC-024	Concurrent Login Attempts from Multiple Devices - Edge	Edge	From Device A, log in with valid credentials From Device B, simultaneously attempt to log in with the same credentials Observe session handling on both devices	Both devices receive valid sessions (or the platform enforces single active session policy as defined); no race condition or session corruption occurs.
